

Diana Ashworth

Consultant

ABOUT DIANA

With over 20 years of accounting experience, Diana has extensive knowledge in various aspects of accounting, including the month-end close process, financial reporting, consolidations, general ledger, inventory, and fixed assets. She is proficient in multiple software solutions such as SAP, Peoplesoft, Cognos, and QuickBooks, and she is highly skilled in converting manual and inefficient processes to improved automated solutions, resulting in the collection of meaningful quality data.

Diana understands the integral functions of an accounting department, as she has held various progressive accounting roles, including financial analyst, senior accountant, and assistant controller. She applies her expertise to efficiently document accounting processes, perform comprehensive financial analyses, and quickly identify opportunities for process improvement. Diana's systems knowledge has proven to be valuable in supporting ERP implementations, and her excellent problem-solving and communication skills allow her to handle even the most complex accounting issues, while effectively collaborating with others to identify potential solutions.

Clients value Diana's well-rounded background and solid accounting skills. They especially appreciate her ability to develop a rapport with the team quickly and to train and mentor others. This combination of skills makes her invaluable to any client engagement.
